

Building a production grade automation in minutes with SAP Intelligent RPA

Thierry Gourdin, Christophe Puget, Samir Hamichi, Jerome Grondin, Benoit Cayzergues, Christophe Dolimont, Fred Vanborre, SAP
November 17-18, 2021

PUBLIC

Agenda

Introduction about Intelligent RPA

- Understanding low code no code

Onboarding on Intelligent RPA

- Trial subscription and Agent installation

Exercise 1: RPA Challenge use case

- Capture the RPA challenge web application

Exercise 2: RPA Challenge use case

- Design and debug a BOT as a business user

Exercise 3: Fix issues in RPA Challenge BOT

- Troubleshoot a failing productive BOT

Conclusion

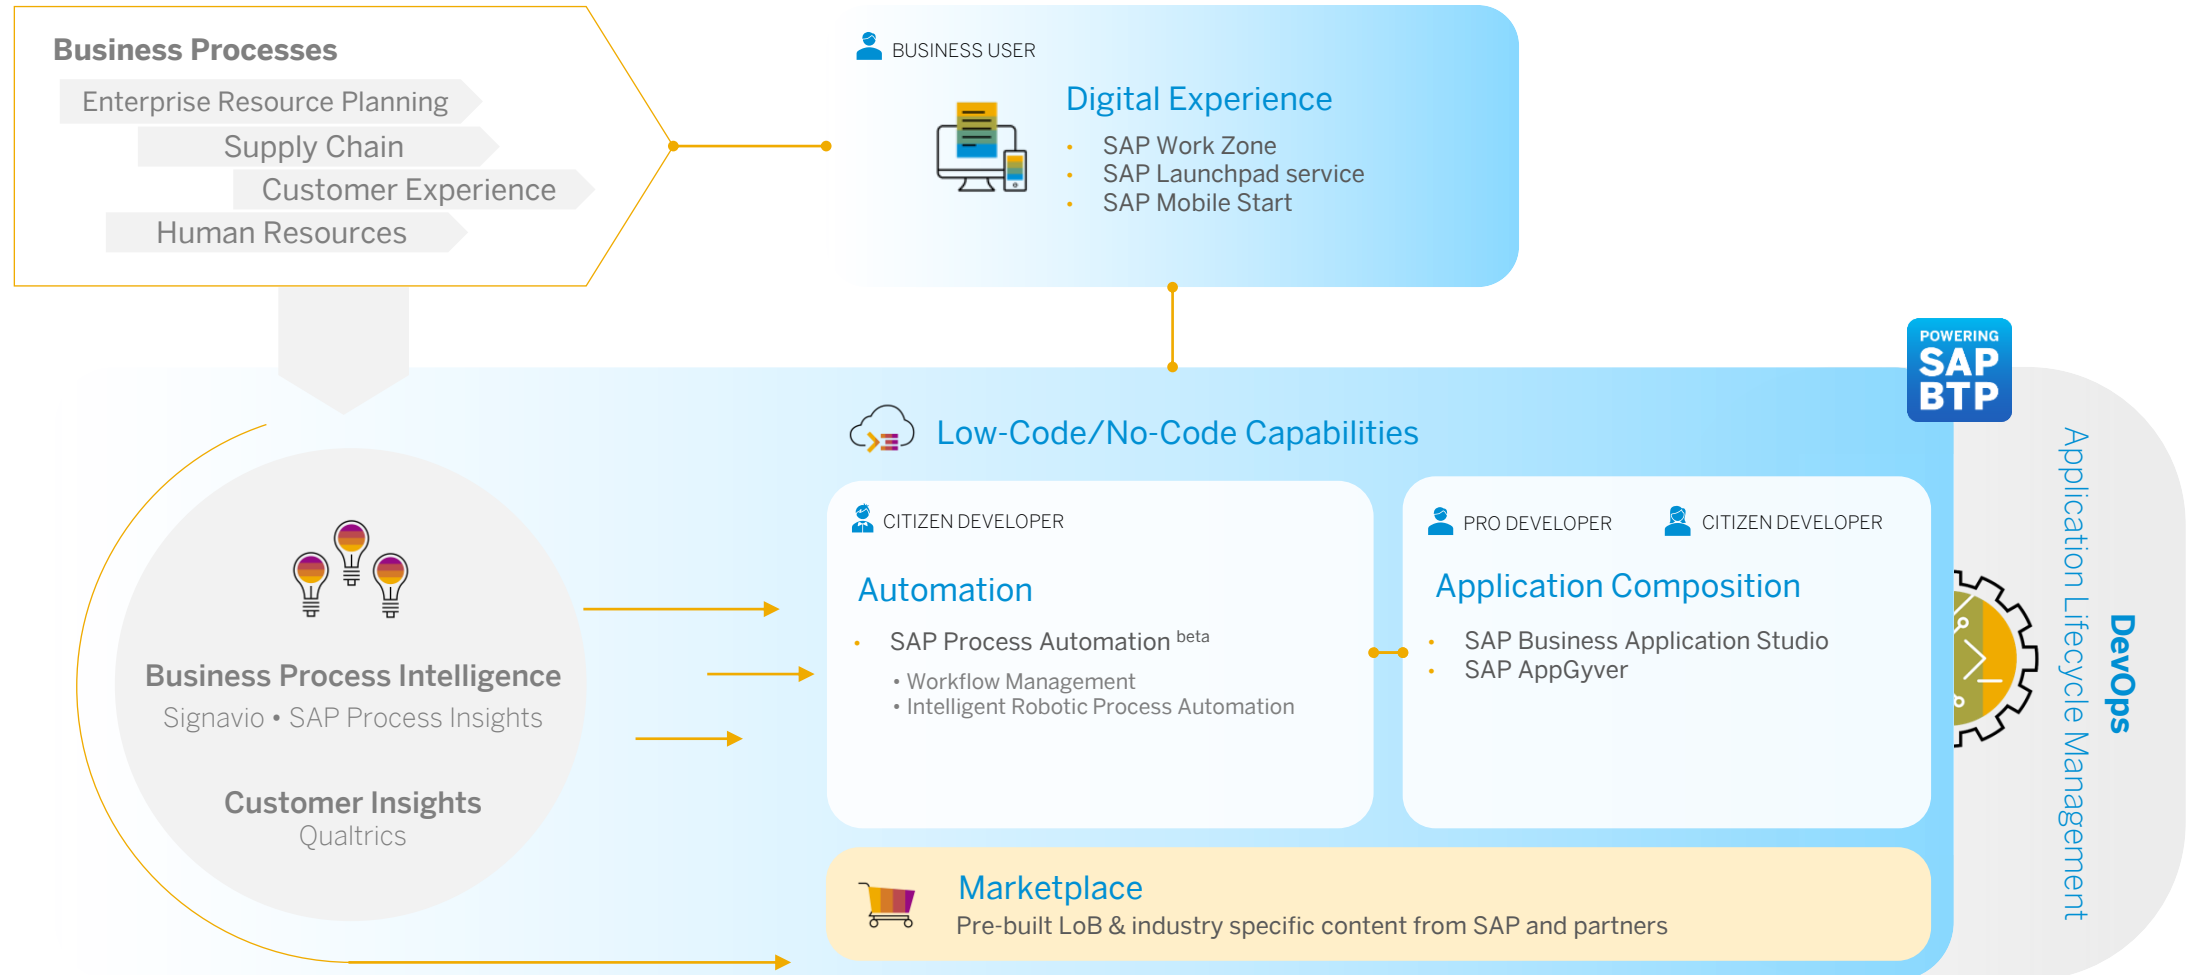

- Deploy your 1st BOT in a few hours

Introduction

Accelerated Time to Value with Low-Code/No-Code

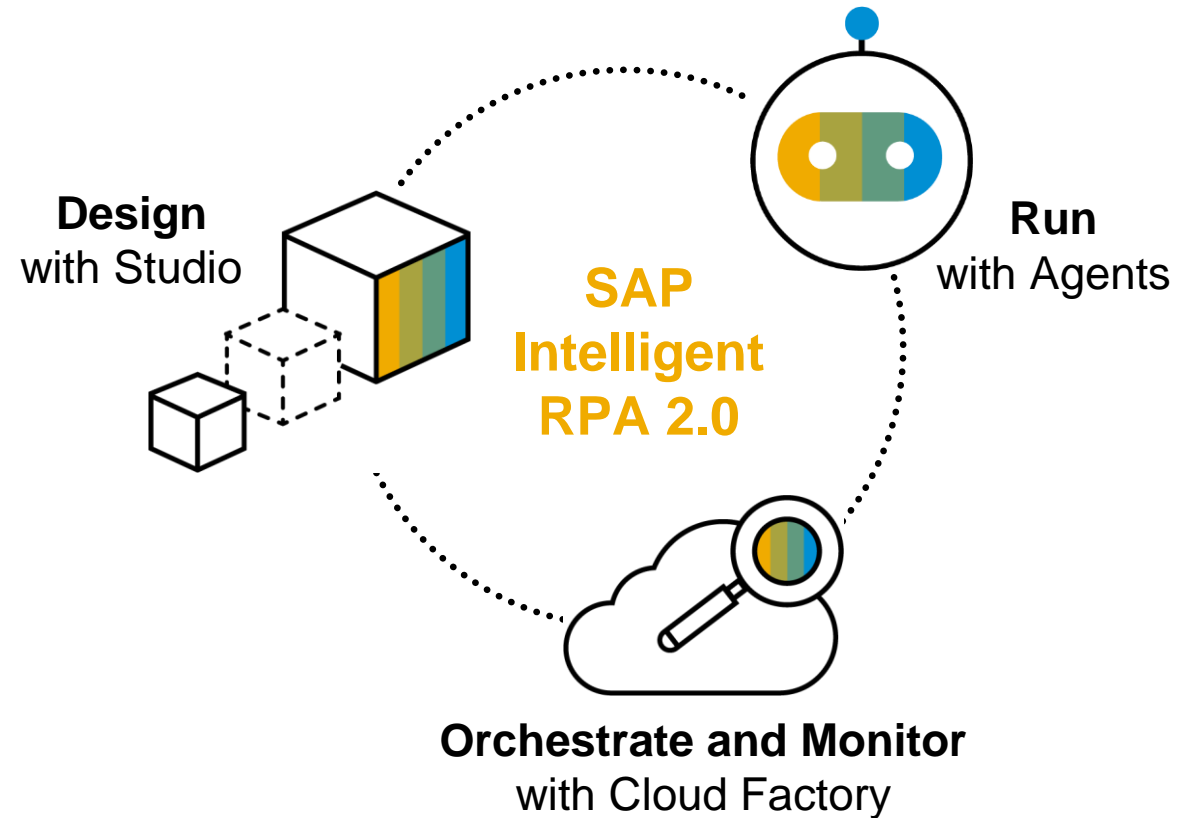

Unified offering across App Development, Process Automation & Digital Experience

SAP Intelligent Robotic Process Automation (RPA)

Accelerate Digital Transformation by Automating Repetitive Tasks in Business Processes

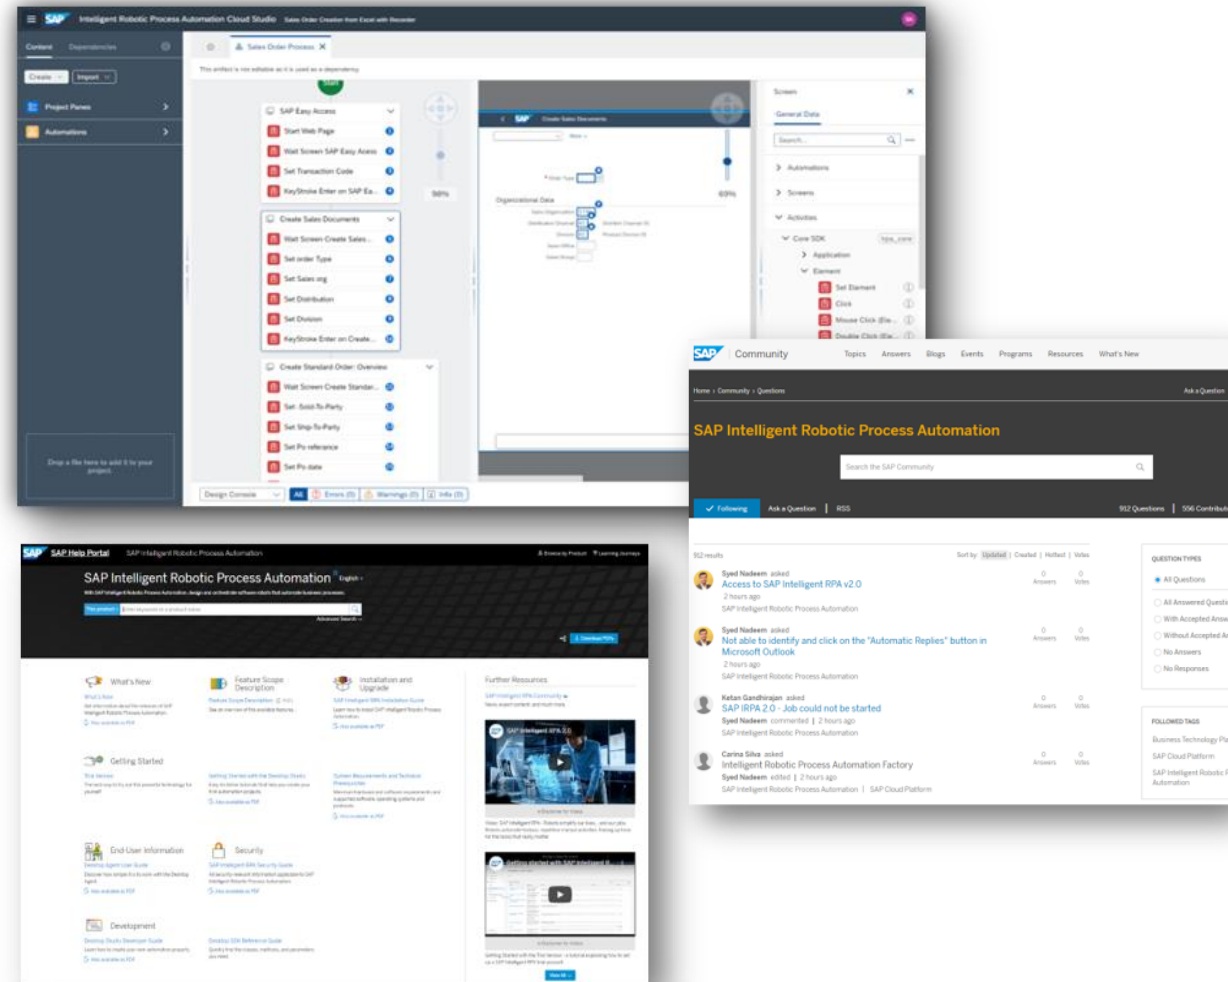

- Who** Citizen developers and business process experts
- What** Build bots to **augment** and **automate** human tasks across LoBs and Industries
- Why** Save time, costs and reduce human errors in business operations.

Low Code/No Code User Experience

Simple browser-based bot building experience for citizen developers:

- Drag and drop editor
- Workflow builder
- No-code experience for simple use cases
- Event-based capture for bot building
- Low-code experience with JavaScript
- State-of-the-art debugger
- Intuitive documentation and active developer community

Exercise 2: RPA Challenge

Exercise 2: RPA Challenge

Design and debug a BOT as a business user

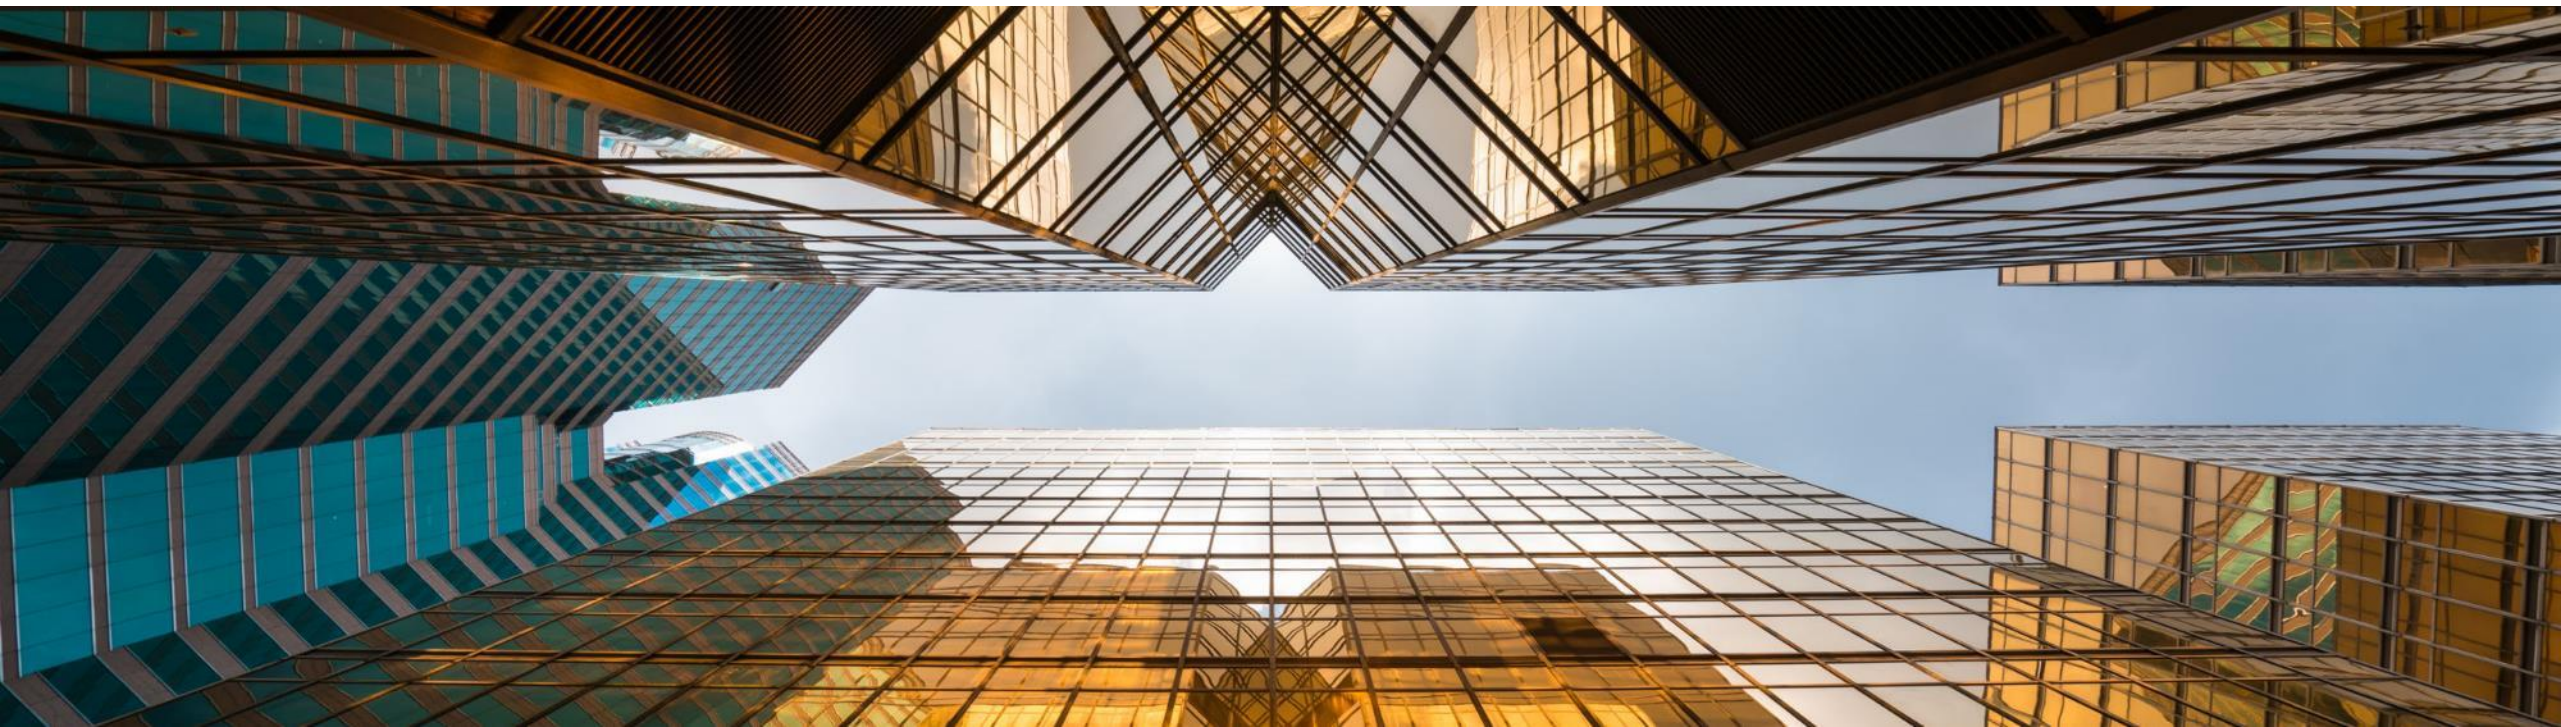

Design a BOT

- [Design an automation](#)
- [Update challenge for download](#)
- [Fill fields automatically](#)
- [Execution your BOT](#)

Instructions on GitHub

<https://github.com/SAP-samples/teched2021-INT160/tree/main/exercises/exercise2>

Exercise 3: Troubleshooting

Exercise 3: Troubleshooting

Troubleshoot a failing productive BOT

Activate traces to troubleshoot your BOT

Instructions on GitHub

<https://github.com/SAP-samples/teched2021-INT160/tree/main/exercises/exercise3>

Conclusion

Innovations on the SAP Intelligent RPA Roadmap

Cloud Studio: SAP and third-party API integration with no-code activities

- Native integration and embedding – SAP and third party
- Ready-made content via store and marketplace

Run enterprise-grade automations at scale

- Cloud-based runtime for automation of SaaS/web apps
- Automated factory management

Understand BOT behavior

- Ready to use integrated hot debugger
- Troubleshoot and update productive BOTs
